

## This is how you can simply and easily determine the perfect ring size for yourself:

### METHOD A

Do you already have a ring that fits you perfectly but you don't know the size?  
No problem - just measure the inner diameter of your jewelry piece and you'll already know the ideal measurements.

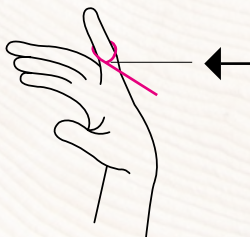

EU:	50 mm	52 mm	54 mm	56 mm
GB:	K	L+1/2	N	P
USA:	5.3 (5)	6.1 (6)	6.8 (6-)	7.6 (7-)
FR   IT:	10	12	14	16

### METHOD B

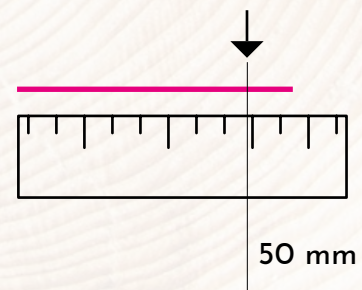

👉 For this, you'll need a piece of string and a ruler

#### THIS IS HOW IT WORKS:

- ① Wrap the string around your finger and mark the place where the string meets itself

- ② Now measure the piece of string to determine the perfect ring size

👉 TIP: Instead of string, you can also use a strip of paper or simply a measuring tape as an alternative.
